PROFILE SUMMARY

Full Stack Developer with hands-on experience building end-to-end web applications with React, Node.js, Express.js, MongoDB and PostgreSQL. Delivered three deployed projects featuring JWT and session-based authentication, role-based access, REST APIs, cloud image uploads and admin dashboards. Seeking a Full Stack or Frontend Developer role to ship reliable, maintainable features in a collaborative team.

CORE COMPETENCIES

Full Stack Development | REST API Design | Authentication & Authorization | Role-Based Access Control | Responsive UI | State Management | Database Design | Git Collaboration (Pull Requests)

TECHNICAL SKILLS

Languages: JavaScript (ES6+), HTML5, CSS3
Frontend: React, React Router, Redux Toolkit, TanStack Query, Context API, Tailwind CSS, Vite
Backend: Node.js, Express.js, REST APIs, JWT, Session-Based Auth, Multer, Nodemailer
Databases: MongoDB, Mongoose, PostgreSQL (Beginner)
Tools: Git, GitHub, Postman, Docker (Beginner), Cloudinary, Vercel, Netlify

PROJECTS

Lumira E-Commerce Store | Live Demo

React, Tailwind CSS, Redux Toolkit, TanStack Query, Node.js, Express.js, MongoDB, JWT, Multer, Cloudinary

- Built a full-stack skincare store with shop filtering and sorting, cart, checkout and order tracking, delivering a complete browse-to-order customer flow.
- Developed an admin dashboard with sales analytics and product/category management, secured with JWT admin-protected API routes.
- Integrated Multer and Cloudinary so admins can upload product images directly from the dashboard.

Team Task Management App | Live Demo

React, Tailwind CSS, Context API, Node.js, Express.js, PostgreSQL, Docker

- Implemented team creation and role-based task assignment, with session-based authentication restricted to verified members.
- Designed PostgreSQL schema and CRUD APIs; containerized the application with Docker.
- Collaborated through GitHub pull-request workflows, including code review and branch management.

Marginalia - Full-Stack Blog Platform | Live Demo

React (Vite), Tailwind CSS, Node.js, Express.js, MongoDB, Mongoose, JWT, Nodemailer

- Built a blog platform with create, edit and delete posts, secured by JWT access/refresh-token authentication.
- Implemented OTP-based password reset via Nodemailer and image uploads via Multer and Cloudinary.
- Designed a notebook-inspired responsive interface on a React/Vite frontend and Express/Mongoose backend.

EDUCATION

Associate Degree Program (ADP) in Artificial Intelligence - In Progress (1st Semester)
Intermediate (ICS - Physics) - Completed
Matriculation (Computer Science) - Completed

LANGUAGES

Urdu (Native) | English (Intermediate, B1)
