FULL STACK DEVELOPER

AHSAN MUDASSAR

+92 309 4023675 | Lahore, Pakistan | ahsanmudassar441@gmail.com | LinkedIn | GitHub | Portfolio

SUMMARY

Full Stack Developer with hands-on experience building end-to-end web applications using React, Node.js, Express.js, and database-backed REST APIs. Through project work, I have implemented responsive user interfaces, authentication flows, role-based access, CRUD operations, cloud image uploads, and administrative tools. I value clear communication, thoughtful collaboration, and maintainable code, and I aim to contribute reliably while continuing to strengthen the quality and usability of the products I help build.

TECHNICAL SKILLS

Languages: HTML5, CSS3, JavaScript (ES6+)
Frontend: React, React Router, Tailwind CSS, Context API, Redux Toolkit, TanStack Query, Vite
Backend & APIs: Node.js, Express.js, REST APIs, JWT & session-based authentication, Multer
Databases: MongoDB, Mongoose, PostgreSQL (Beginner)
Tools & Platforms: Git, GitHub, GitHub PR workflows, Docker (Beginner), Cloudinary, Netlify, Vercel
Concepts: Responsive Web Design, Component-Based Architecture, State Management, Role-Based Access, CRUD Operations, API Integration (Fetch, Axios)

PROJECTS

Lumira E-commerce Store

Live Demo

Developed a skincare e-commerce platform with an optimized home page, advanced shop filtering and sorting, cart management, checkout, and order tracking. Built an admin dashboard for sales analytics, order tracking, and product/category management, supported by REST APIs and admin-protected routes.

Tech: *React, Tailwind CSS, Redux Toolkit, TanStack Query, Node.js, Express.js, JWT Authentication, Multer, Cloudinary, REST APIs*

Team Task Management

Live Demo

Built a team task management application supporting team creation, role-based task assignment, and secure session-based authentication for verified members. Implemented PostgreSQL CRUD operations and credential/secret record storage, containerization with Docker, and collaborative GitHub pull-request workflows.

Tech: *React, Tailwind CSS, Context API, Node.js, Express.js, PostgreSQL, Session-Based Authentication, Docker*

Marginalia - Full-Stack Blog Platform

Live Demo

Built a full-stack blog platform for creating, editing, and deleting posts, with JWT access/refresh-token authentication, OTP-based password reset via Nodemailer, and image uploads using Multer and Cloudinary. Designed a notebook-inspired interface with a React/Vite frontend and Express/Mongoose backend.

Tech: *React (Vite), React Router, Tailwind CSS, Node.js, Express.js, MongoDB, Mongoose, JWT, Nodemailer, Multer, Cloudinary*

EDUCATION

ADP-AI — 1st semester
Intermediate - ICS (Physics) — Completed
Matriculation - Computer Science — Completed

LANGUAGES

Urdu: Native | **English:** Intermediate (B1)
